</table>
Ten years ago the dream began with two men that founded it all. They started from scratch. They learned to machine metal. They shaped their dreams. They created SilencerCo.

A decade later, SilencerCo is the largest silencer manufacturer in the world, nestled in the desert of the American West.

We’re shooters, too. We know the struggle of finding quality product that performs. We know stupid happens, which is why our lifetime warranty covers stupid... once. We set the standard for quality and innovation. From the first non-round pistol silencer, to the first integrally suppressed 9mm pistol, we continue to raise the bar for the industry.

We don’t settle for less than perfection. We shoot for short, light, and quiet, but we make noise when it matters — we fight for your second amendment rights. Loudly.

#FightTheNoise
DON'T SETTLE FOR LESS THAN PERFECTION.
WE NEEDED A CHANGE.

We needed a change. The firearms industry needed a change. We sought to invent something the world didn’t have before — an integrally suppressed 9mm pistol.

Don’t let the front end fool you — the Maxim® 9 is shorter and lighter than standard suppressed pistols due to the mostly-hollow muzzle. The full configuration is compatible (and hearing safe) with all 9mm ammunition, including JHP.

In the short configuration of just 9.54” the Maxim 9 remains hearing safe with subsonic ammunition. Remove baffles by simply unthreading two screws to ensure easy length adjustment and serviceability. Field disassembly never requires the user to pull the trigger, unlike other manufacturer’s models.

Holsterable and accurate, the Maxim 9 is the leading choice for short, light, and quiet handguns. Now you can have the best of all worlds with the Maxim 9.
MODULAR
USER SERVICEABLE
INTEGRALLY SUPPRESSED
LE / MIL

LEFT: MAXIM 9 / LONG CONFIGURATION
RIGHT: MAXIM 9 / SHORT CONFIGURATION
Removable optics plate makes way for a variety of aftermarket optics. Visit SILENCERCO.COM for optics mounting plates.

Takes Glock® 17 and compatible aftermarket magazines. Ships with (2) Magpul® PMAG™ 17 GL9 magazines.
Holsterable in short and long configurations. Visit SILENCERCO.COM for left and right hand holster options.

MAXIM 9 / SHORT CONFIGURATION

User-configurable length for maximum adaptability; all parts included.

MAXIM 9 / LONG CONFIGURATION

GUNFIGHTERS(INC)® RONIN OWB HOLSTER (LEFT HAND)
Enjoy suppressed shooting across the country. No 4473, no $200 tax stamp, no photographs, and no fingerprints. Ship a Maxim 50 straight to your door with few exceptions.

Most states classify muzzleloaders as “antique firearms,” therefore a moderator permanently affixed is merely that — a moderator — not a silencer. Yet the Maxim 50 holds the same benefits as a suppressed rifle: reduced recoil and hearing safe sound results.

Increase your hunting season by days (even weeks) with the Maxim 50. Make your shot with certainty; watch it all the way through. With a 2/3 reduction of smoke (compared to non-moderated muzzleloaders), you’ll never lose sight of your game.

NO NFA WAIT TIME.
With no barrel restrictions, the Chimera is arguably the best choice for a short barreled rifle (prepare to build your two-tax-stamp setup). Full-auto rated and compatible with .22 Hornet to .300 Winchester Magnum, the Chimera is usable on a variety of hosts. The Chimera is shipped with the reliable quick-attach ASR Mount and a 5/8 X 24 Muzzle Brake for easy installation.

Compatible with Saker ASR mounts, muzzle devices, and front caps — the versatility you’ve come to expect from SilencerCo.
CHIMERA 300

5.56MM TO .300 WM

Full auto rated.

Updated ASR Mount for easier grip.

CHIMERA 300 with ASR Mount & Flat Front Cap / Noveske N4

CHIMERA 300 with ASR Mount & Flat Front Cap / Dakota Tactical® GSK / Leupold® Mark 6
Mounts, muzzle devices, and front caps are exchangeable with the Saker ASR series.

No barrel restrictions.
WE FIGHT FOR YOUR SECOND AMENDMENT RIGHTS. LOUDLY.
SAKER ASR 762 WITH ASR MOUNT & FLAT FRONT CAP / SPRINGFIELD® M1A

SAKER ASR 556 WITH ASR MOUNT & FLAT FRONT CAP / FN® M249
Enjoy unmatched versatility with the Saker ASR series. Available in 762, 556, and 556K models, the Saker ASR is built to take some serious shooting. With no minimum barrel lengths, the Saker ASR is a great match for almost any rifle.

The Saker ASR comes with the fast-attach ASR mount and an ASR flash hider (556 & 556K) or an ASR muzzle brake (762) — but it doesn’t stop there.

The Saker ASR is compatible with various mounting options including the MAAD Mount, Y-Mount, Direct Thread Mount, and more.

Compatible with Chimera 300 mounts, muzzle devices, and front caps — the versatility you’ve come to expect from SilencerCo.
SAKER ASR SERIES

CENTER: SAKER ASR 556 WITH ASR MOUNT & FLAT FRONT CAP / FNH® FNC 5.56
RIGHT: SAKER ASR 762 WITH ASR MOUNT & FLAT FRONT CAP / FNH 15 TACTICAL II
BUILT TO TAKE SOME SERIOUS SHOOTING.
A favorite of all shooters, the Omega 300 is the best selling rifle silencer. Ever. Compatible with calibers 5.7mm to .300 WM, the Omega 300 finds its way into hunting, precision shooting, range shooting, and full-auto applications. With a wide range of accessories, you can ensure the Omega is ready for any situation.

Comes complete with direct thread and fast attach mounts as well as a removable Anchor Brake to reduce recoil, which can be replaced with a flat front cap in a multitude of calibers. Mounting options are compatible with Harvester 338 and Hybrid 46—the versatility you’ve come to expect from SilencerCo.

CENTER: OMEGA 300 WITH ANCHOR BRAKE & DIRECT THREAD MOUNT / FN 15 TACTICAL II / VORTEX SPARC
RIGHT: OMEGA 300 WITH ANCHOR BRAKE & ASR MOUNT / INSIGHT® AR-15 / ARMAMENT TECHNOLOGY® ELCAN SPECTRDR
5.56MM TO .300 WM

THE BEST SELLING RIFLE SILENCER. EVER.
Variety of thread mount options for both Harvester 300 and 338. Harvester 338 is compatible with the ASR Mount.

Harvester 338 with ASR Mount / Barrett® MRAD 338LM / Nightforce® ATACR™

Up to 50% recoil reduction depending on caliber.
Designed to improve any hunter’s game, the Harvester series is lightweight and fully welded. Both models feature the recoil-reducing Anchor Brake for quick target reacquisition and follow-up shots.

Harvester 300 is the answer for sportsmen. At only 11 oz, it’s the lightest direct thread .300 Win Mag silencer in existence. A variety of thread mounts make the Harvester 300 compatible with most rifles from 5.56mm to 300 WM. Track game without unnecessary weight, and make the shot the first time, every time.

Harvester 338 takes calibers 5.56mm to .338 LM with ease. Mounting options range from a variety of thread options to the fast-attach ASR mount. Fully welded to ensure reliability with even the largest calibers, the Harvester 338 is the answer for long-range shooters. Compatible with Omega 300 and Hybrid 46 mounts — the versatility you’ve come to expect from SilencerCo.
AS WE CONTINUE TO EDUCATE THE MARKET, IT GROWS EXPONENTIALLY.
OSPREY SERIES

OSPREY 9: 9MM & .300 BLK SUBSONIC
OSPREY 45: 9MM TO .45 ACP & .300 BLK SUBSONIC
OSPREY 45K: 9MM TO .45 ACP & .300 BLK SUBSONIC
The Osprey series holds a vast amount of internal volume, offering the best sound suppression of any centerfire pistol silencer. Patented octagonal design allows clearance for most factory sights.

Our patented cam locking system ensures the flat sight plane can be easily indexed every time without shims. Plus, once the Osprey has aligned to a host, you won’t have to re-index until you switch to a new firearm. Though switching may be irresistible, since the Osprey is compatible with .300 BLK subsonic.

Compatible with Octane and Hybrid 46 pistons — the versatility you’ve come to expect from SilencerCo.
Durability is a critical feature of the Octane series. Available in 9mm and .45ACP (.45ACP comes in standard and K version), the Octane series is user-serviceable, and ridiculously reliable. Multiple mounting options promise versatility across a multitude of platforms. Mount it on anything from semi-automatic pistols to carbines to submachine guns — even the iconic H&K® MP5. Switch to a direct thread mount and fire away on a .300 BLK rifle (subsonic only).

CTA (Click Together Assembly) baffles are easily disassembled, making the Octane the most durable pistol suppressor on the market. With the Octane series, serviceability can be expected even after heavy firing or use of lead bullets.
OCTANE 9: 9MM, .357 SIG, & .300 BLK SUBSONIC
OCTANE 45: 9MM TO .45 ACP & .300 BLK SUBSONIC
OCTANE 45K: 9MM TO .45 ACP & .300 BLK SUBSONIC
Versatility at its finest. The Omega K series offers extreme durability in an ultra-compact package. Small, light, and quiet, the Omega K series is compatible with pistols, rifles, and submachine guns.

Minimalist lengths make Omega K the shortest option for both 9mm and .45ACP hosts, while still boasting compatibility with .300 BLK (subsonic and supersonic). Full auto rated and seriously lightweight, big sound suppression comes in a tiny footprint.

The Omega K series is compatible with all SilencerCo pistons — the versatility you’ve come to expect from SilencerCo.

New for 2018 — the Omega K quick-attach ASR Mount facilitates easier attachment to rifles and submachine hosts.
LEFT: OMEGA 45K / ED BROWN CUSTOM 1911 / TRIJICON RMR
RIGHT: OMEGA 9K / NEMO® ARMS .300 BLK / VORTEX SPARC
We wanted an all-in-one solution, a silencer for any demand. We revisited the market’s needs, and designed a universal silencer — the Hybrid™ 46.

The Hybrid ships with an internal piston housing for use on semi automatic pistols, as well as a direct thread mount for rifle applications. Switch to the fast-attach ASR Mount for rapid connection. Rated for 9mm to .45 ACP (pistols), and 5.56mm to .45 – 70 GOV (rifles) so you can spend more time doing what you love most — shooting.

Compatible with Harvester 338 and Omega 300 mounts; Osprey and Octane pistons — the versatility you’ve come to expect from SilencerCo.

HYBRID 46 WITH PISTON HOUSING / ED BROWN 1911
AMERICAN CITIZENS SHOULD BE ENTITLED TO SAFE & ENJOYABLE SHOOTING.
SilencerCo’s keystone product, the Sparrow, was our first silencer. Ten years later, it still has the quietest 10 round average of any silencer in its class. Patented Multi-Part Containment (MPC™) technology facilitates easy disassembly and reassembly.

Multi-caliber compatible and full auto rated (.22LR only), the Sparrow is a shooter’s gateway silencer. And like all our rimfire cans, it’s highly user-serviceable. The internal core is a single stainless steel structure that remains easy to clean — even after heavy fire with notoriously dirty rimfire ammunition.
THE QUIETEST FIRST ROUND POP OF ANY RIMFIRE SILENCER.
The Spectre™ 22 has the quietest first round pop of any rimfire silencer. Constructed from stainless steel, the Spectre is reliably durable and user-serviceable. Internal CTA (Click Together Assembly) baffles remain easy to clean under a heavy firing schedule.

Multi-caliber rated from .22LR to 5.7 X 28mm, the Spectre is suitable for a wide variety of pistol and rifle hosts. Take it full auto (.22LR only) to see its full potential.
At only 3.0 oz, the Warlock™ 22 is the lightest .22LR silencer on the market. Don’t let the weight fool you — the Warlock reduces sound to 114.6 dB, thanks to its high-strength baffle design.

Rated for .22LR, the Warlock 22 is a practical option for the incredibly popular caliber. Internal CTA (Click Together Assembly) baffles ensure the silencer remains highly user-serviceable, like all our rimfire cans.
Suppressed shotguns are no longer a thing of the future. We proudly released the Salvo™ 12 in 2014. Four years later, no other silencer company has successfully challenged its design.

Patented internal rod structure allows shotgun shells to function normally with most pump action and semi-automatic shotguns.

Our assortment of choke mounts support most shotgun models. Customizeable configurations of 6", 8", 10", and 12" allow the end user to modify to their needs. With our choke mounts and four length configurations, shoot suppressed for any desire.
SALVO 12

12 GAUGE
INNOVATION IS RISKY, BUT IT’S WORTH THE REWARD.
MAXIM 9

Ships in the long configuration. Comes with everything the user needs to shorten the overall length by over one inch.

SilencerCo’s Omega 9SD features superior dB results and a notable just-short-of 4” than the original. Fully welded from base to front cap, the Omega 9SD mitigates full auto recoil. Internal threads are cut to the MP5SD’s thread pitch for specialized use.

Dealers, to place an order, contact us directly at SALES@SILENCERCO.COM.

For military, law enforcement, or government inquiries, contact GOVT@SILENCERCO.COM. For civilian purchases, request through your dealer.
