# SALVO 12

Everyone who owns a gun owns a shotgun, but until SilencerCo stepped in, most of them had never been suppressed. The Salvo™ 12 is the only commercially-viable, modular, hearing safe shotgun silencer on the market. Designed to operate with most pump action and semi

automatic shotguns, at its full length of 12" the Salvo 12 brings sound down to 136.8 dB at the muzzle. Configurations of 6", 8", 10", and 12" allow the end user to customize the Salvo 12 for sporting clay, waterfowl, turkey hunting, home defense, and many other applications.

- Attaches via choke mount to most commercially available gas operated, inertia driven, or pump action shotguns with barrels threaded for chokes.
- Modular design allows the user to shorten the silencer to 6", 8", or 10" configurations to balance size, weight, and sound requirements.
- Rated for wadded shells up to 3" including buckshot and slugs.
- Can be shortened to 8" configuration and remain hearing safe at the ear.
- Noticeably reduces felt recoil.
- Choke mounts and rod kits sold separately – choke mounts available in improved cylinder, modified, improved modified, and full.
