

# WARLOCK 22

---

USER SERVICEABLE

LIGHTWEIGHT

The Warlock™ 22 has an exceptional weight-to-strength ratio, and is one of the lightest .22LR silencers on the market. Due to the notoriously harsh nature of rimfire ammunition, this product features CTA™ (Click Together Assembly) baffles to ensure the

silencer remains easy to clean – even after long days at the range. Thanks to its high-strength baffle design and lightweight aluminum construction, the Warlock 22 weighs only 3.0oz and reduces sound to 114.6 dB, proving that big results can come from small packages.
