

OMEGATM 36M

A light, compact, modular centerfire rifle suppressor, with the versatility to use on magnum rifles, 9mm pistols and sub guns. The Omega 36M is a two-piece modular design with a fully welded core, front and rear. The rear core contains Cobalt 6 and Inconel baffles which provide extreme wear resistance under high heat and heavy fire.

The front core consists of a new lightweight 17-4 baffle design to save weight while still providing high wear resistance. The titanium outer tube with lock-ring prevents tube loosening and reduces weight. The 36M is finished with a black Cerakote for a heightened level of durability.

Omega 36M
